

Project One: Mad Libs

Due: February 16, 2009

Description: For this project, you will be developing a simple Mad Libs game. Your HTML form should contain at least 10 input elements (textbox, dropdown, radio buttons, etc). When a user clicks on the 'submit' button, a story should be constructed using the values from the form. Also, you should stylize the HTML form elements using CSS.

Create a new folder for this project in your web directory. You should name the folder 'madlibs'. This project should contain the following files:

1. PHP script - 'index.php'
2. CSS style sheet - 'styles.css'
