

# Project One – Digital Imaging Project

**Due:** October 6, 2008 (at the beginning of class)

**Assignment:** Create one or more digital images using Adobe Photoshop that utilize the skills and themes explored in class. The subject matter for this project is entirely opened ended, although you should choose an idea that you are excited about pursuing. Look through as many digital art portfolios, magazines and tutorials to generate additional ideas and techniques.

You will meet with the instructor and other classmates along the way to gain feedback on your idea and the execution of your work.
