

Project Three – A short film

Due: December 8, 2008 (at the beginning of class)

Assignment: Create a short video (1 – 3 minutes). The subject matter for this project is entirely opened ended, although you should choose an idea that you are excited about pursuing. View as many short films as you can before shooting. You may compile the final product in Final Cut Pro, Flash or Premiere. The final rendered video should be a .mov (DV quality).

The assignment is broken up into three parts:

1. Storyboard
2. Shooting your video
3. Post production

We will be showing our films on the last day of class. Please make sure that your video is rendered out to a .mov file (not a FCP project file).

* Also, you may work in pairs/groups if you choose (although, not required).
